1. Nature of Business and Basis of Presentation

Titanium Corporation Inc. ("Titanium" or the "Company") was formed by articles of amalgamation under the Business Corporations Act (Ontario) on July 24, 2001. The Company is engaged in the business of developing a commercial separation process for the recovery of titanium and zircon from Canada's oil sands (the "Oil Sands Project"). The Company is considered to be in the development stage as it has yet to earn any revenues and it is devoting substantially all of its efforts toward the development of this process.

The underlying value of the Company's Oil Sands Project is dependent upon the completion of certain technical programs, the successful completion of a feasibility study and the Company's ability to raise financing for the construction of commercial facilities. The Company believes it has sufficient financial resources to complete the design, engineering and feasibility assessment of the Oil Sands Project and for working capital purposes.

Management is of the opinion that additional funding is available and may be sourced in time to allow the Company to build the commercial scale plant. While it has been successful in the past, there can be no assurance that it will be able to raise sufficient funds in the future.

The unaudited financial statements have been prepared in accordance with Canadian Generally Accepted Accounting Principles for interim financial information. Accordingly, they do not include all of the information and notes to the financial statements required by Canadian generally accepted accounting principles for annual financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Net losses for the three and nine month periods ended May 31, 2007 may not necessarily be indicative of the results that may be expected for the year ending August 31, 2007.

The balance sheet at August 31, 2006 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by Canadian generally accepted accounting principles for annual financial statements. The interim financial statements have been prepared by management in accordance with the accounting policies described in the Company's annual financial statements for the year ended August 31, 2006. For further information, refer to the financial statements and notes thereto included in the Company's annual financial statements for the year ended August 31, 2006.

2. New Accounting Pronouncements

In January 2005, the Canadian Institute of Chartered Accountants issued four new accounting standards: Handbook Section 1530, Comprehensive Income, Handbook Section 3251, Equity, Handbook Section 3855, Financial Instruments - Recognition and Measurement, and Handbook Section 3865, Hedges. These standards are effective for the Company's fiscal 2008 interim and annual financial statements.

8. Basic and Diluted Loss Per Common Share

The basic loss per share is computed by dividing the loss for the period by the weighted average number of common shares outstanding during the period. Diluted loss per share is the same as basic loss per share. The effect of common share purchase warrants and stock options on the net loss for the periods presented is not reflected as to do so would be anti-dilutive.

The following table sets forth the computation of basic and diluted loss per share:
